ANVILOY® WELD ROD

WELDSTONE
TUNGSTEN COMPONENTS

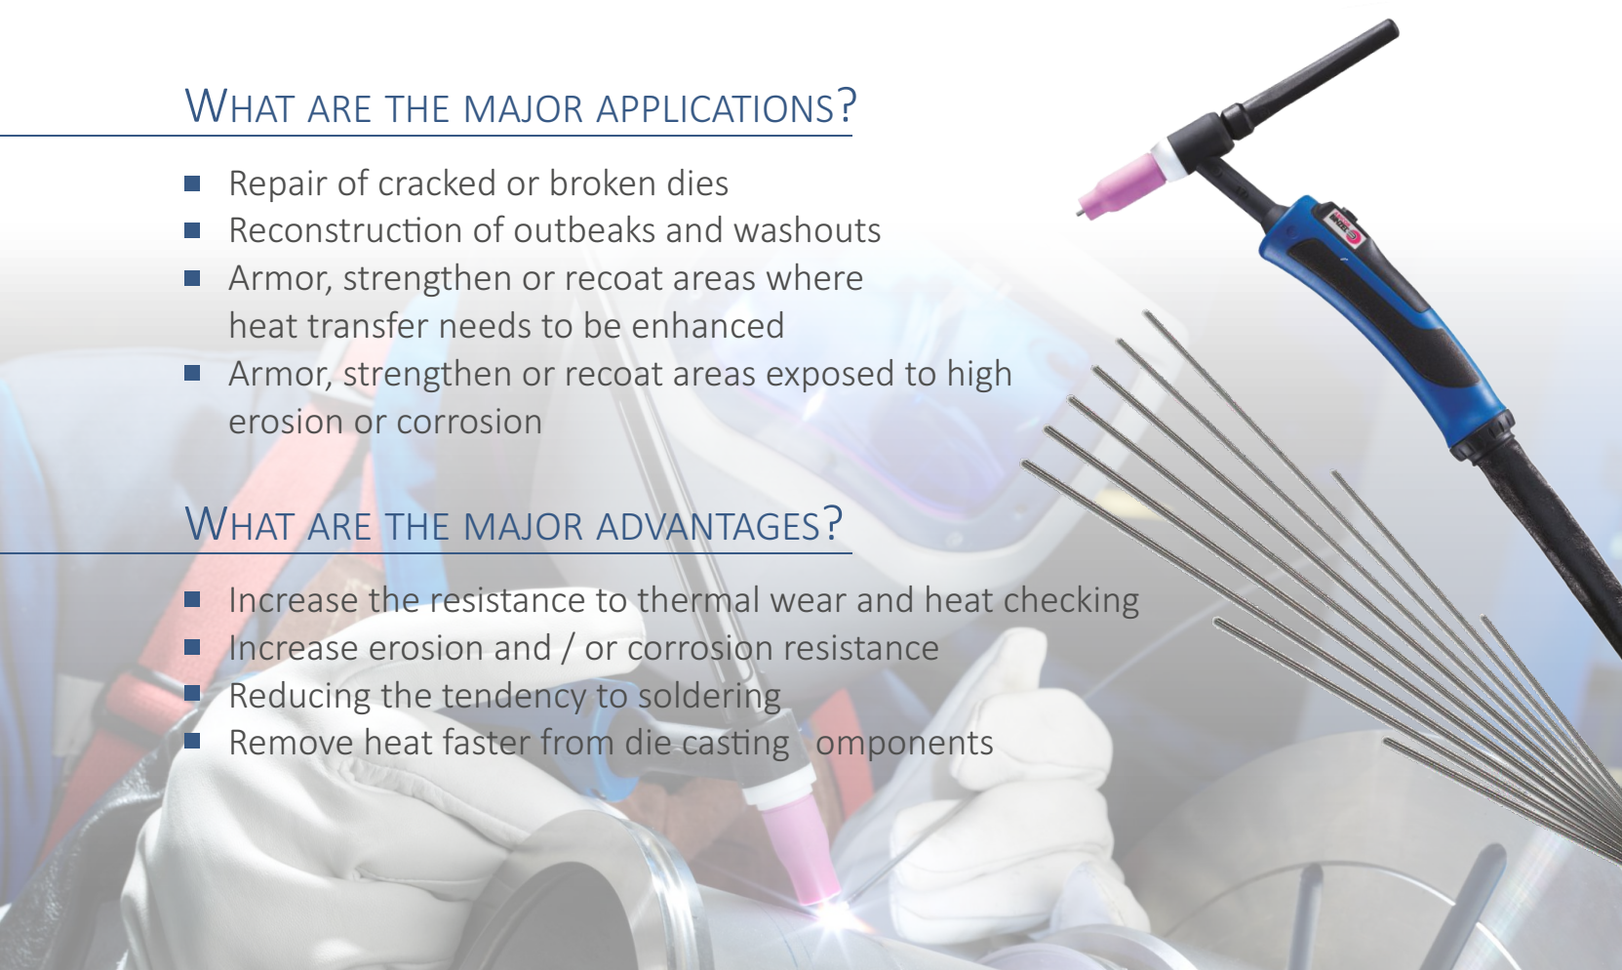

ENHANCEMENT AND REPAIR OF DIES AND INSERTS FOR LIGHT METAL CASTING

ANVILOY® Weld Rod- WHAT IS IT?

Anviloy® Weld Rod is a tungsten-based TIG-welding filler metal available as rod or wire. It is applicable to Hot-work steels such as 1.2344 / H13 and Tungsten Alloys.

WHAT ARE THE MAJOR APPLICATIONS?

- Repair of cracked or broken dies
- Reconstruction of outbeaks and washouts
- Armor, strengthen or recoat areas where heat transfer needs to be enhanced
- Armor, strengthen or recoat areas exposed to high erosion or corrosion

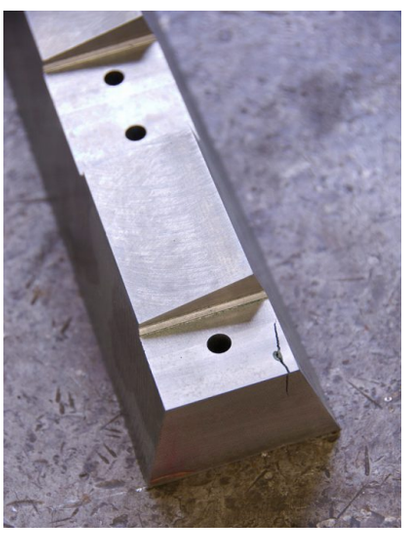

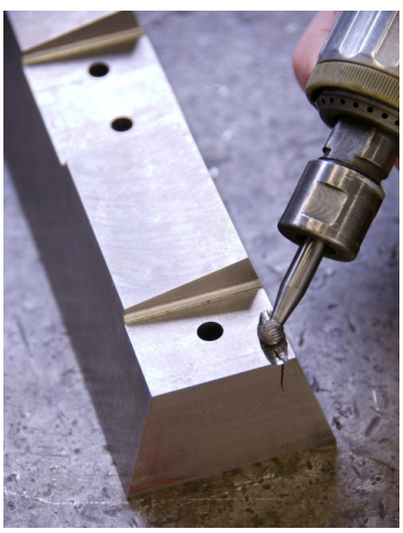

WHAT ARE THE MAJOR ADVANTAGES?

- Increase the resistance to thermal wear and heat checking
- Increase erosion and / or corrosion resistance
- Reducing the tendency to soldering
- Remove heat faster from die casting omponents

IBG GROUP

ANVILOY® WELD ROD

How to get ANVILOY® Weld Rod Products and Support?

Anviloy® Products are exclusively produced and sold by the Astaras / Weldstone Group.

We also offer a wide range of support including technical support, trail support, welding jobs, dealer information, Anviloy® Weld Rod Training Workshops and more.

For more info please contact Your regional Anviloy® Weld rod teams:
